SUMMARY

Frontend developer with hands-on experience building React applications, including an e-commerce platform and a multi-page portfolio site. Proficient in React.js, React Router, Context API, Tailwind CSS, and JavaScript (ES6+). Holds an MS in Software Engineering and brings strong debugging and technical communication skills developed through 2+ years of teaching programming to students. Seeking a frontend React internship or junior role to contribute to real-world products and grow within a collaborative team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python

Frontend: React.js, React Router, React Hooks (useState, useEffect, useContext), Context API, Tailwind CSS, Responsive Design

Tools & Platforms: Git, GitHub, VS Code, Figma, Canva, Vercel, Netlify

Other: REST APIs, Component-based UI, Firebase (Auth, Firestore), Machine Learning (academic)

PROJECTS

Threadify — E-Commerce React App | *React.js · Firebase Auth · Firestore · Context API · Tailwind CSS* <https://threadify-e-commerce-react-website.vercel.app/> · <https://github.com/anooshsalman10/Threadify-Ecommerce-React-Website>

- Built react e-commerce storefront with product listings, dynamic product detail pages, and a fully functional shopping cart using React Router for client-side navigation across multiple routes.
- Implemented global cart state management using React Context API, enabling real-time cart count updates and item management across all components without prop drilling.
- Integrated Firebase Authentication (email/password and Google Sign-In) with protected routes, and implemented Firestore cart persistence and order history — orders are saved per user and retrieved on login.
- Designed a responsive UI with Tailwind CSS covering product grid, cart summary, and related product recommendations; deployed on Vercel.

Personal Portfolio Website | *React.js · React Router · Tailwind CSS · Framer Motion* <https://portfolio-website-react-zeta-six.vercel.app/> · <https://github.com/anooshsalman10/portfolio-website-react>

- Developed a multi-page React portfolio with NavLink-based active state navigation, a mobile-responsive hamburger menu, and smooth page transitions using React Router DOM.
- Built reusable components (Navbar, Hero, Projects, Contact) following component-based architecture best practices, with Framer Motion animations for scroll-triggered section reveals.
- Deployed on Vercel with continuous deployment from GitHub.

Hotel Booking App | *React.js · Firebase Auth · Firestore · Tailwind CSS* <https://hotel-booking-app-react.vercel.app/> <https://github.com/anooshsalman10/hotel-booking-app-react>

- Built a hotel booking application with Firebase Authentication (email/password login, registration, protected routes) and Firestore for real-time data storage.
 - Implemented booking flow with room browsing, detail views, and user session management; structured Firestore collections for scalable data retrieval.
 - Delivered a mobile-responsive UI with Tailwind CSS; deployed on Vercel.
-

WORK EXPERIENCE

Computer Science Teacher — Lahore Grammar School

Aug 2022 – Dec 2024

- Taught Python, HTML, CSS, and JavaScript (ES6+) to 300+ students, designing hands-on project-based lessons that built real coding and debugging skills.
- Developed structured curriculum covering web development concepts including responsive design and DOM manipulation, simplifying complex topics for beginner learners.
- Assisted students with debugging code across projects, sharpening systematic troubleshooting and analytical thinking — directly applicable to professional development workflows.
- Created interactive lesson materials and organized coding competitions, increasing student engagement and confidence with programming.
- Built strong technical communication skills by explaining programming concepts clearly to non-technical learners.

HR Intern (Remote) — HiTechMain, Jakarta

Feb 2025 – Feb 2026

- Assisted in managing and updating the company's recruitment portal, gaining practical exposure to web-based tools and digital workflows in a remote, international setting.
- Collaborated with cross-functional teams via Google Meet and Zoom, building strong remote communication and async working habits.

EDUCATION

Master of Science in Software Engineering

Sept 2020 – May 2023

University of Lahore

- Thesis: "Identification of Kidney Disease using Machine Learning and Deep Learning" — applied Python and ML techniques to a real-world medical dataset.

Bachelor of Science in Computer Science

Oct 2015 – Oct 2019

Lahore College for Women University

- Final Year Project focused on game development; completed core CS coursework in data structures, algorithms, OOP, and software engineering.

CERTIFICATIONS & ADDITIONAL

Soft Skills: Problem-Solving, Technical Communication, Team Collaboration, Attention to Detail, Remote Collaboration
